

A person's hands are shown holding a tablet, with a watch visible on the left wrist. The background is dark with out-of-focus bokeh lights in shades of blue, orange, and red. The text 'DIGITAL SIGNATURE' is overlaid in large white letters.

# DIGITAL SIGNATURE

Made by e-Boks. Digitize the signing process to save time and money

# Digitize the signing process to save time and money

The **e-Boks Digital signature** solution provides an efficient digital signing process. Senders and end users will see the advantage of the digital signing process as it will save time and effort, while also making the business communication a great deal smoother.

In addition, sender will experience an increase in the volume of completed agreements, a growing revenue, and a strengthening of the competitive edge.

End users can sign agreements, such as loans or employee contracts, from their home computers, tablets, or mobile phones 24/7.

Companies can use private or employee certificates when employees sign documents on behalf of the company from the corporate e-Boks. Companies can also decide to delegate corporate documents to be signed from a private e-Boks.

The **e-Boks Digital signature** solution ensures an efficient and speedy digital communication among the contracting parties. In addition, the solution offers a reliable and secure delivery of documents to be signed, notification service, follow-up services, and archiving options.

The **e-Boks Digital signature** solution moreover facilitates important tasks such as validation according to rules and authorization regulations, where applicable for the documents.

# Company benefits

- **e-Boks Digital signature** offers substantial savings compared to the traditional, physical signing process
- Process optimization
- Fast response time and reliable delivery to end user (signer)
- Improved service to end users

- Proactive notifications on mail and/or SMS.

# Functions

- Private signing of documents
- Corporate signing of documents
- Delegate the signing of corporate documents
- Get signing notifications
- Support for PDF, XML, and TXT
- Archiving end user copies in e-Boks
- Archiving sender copies in e-Boks (optional).

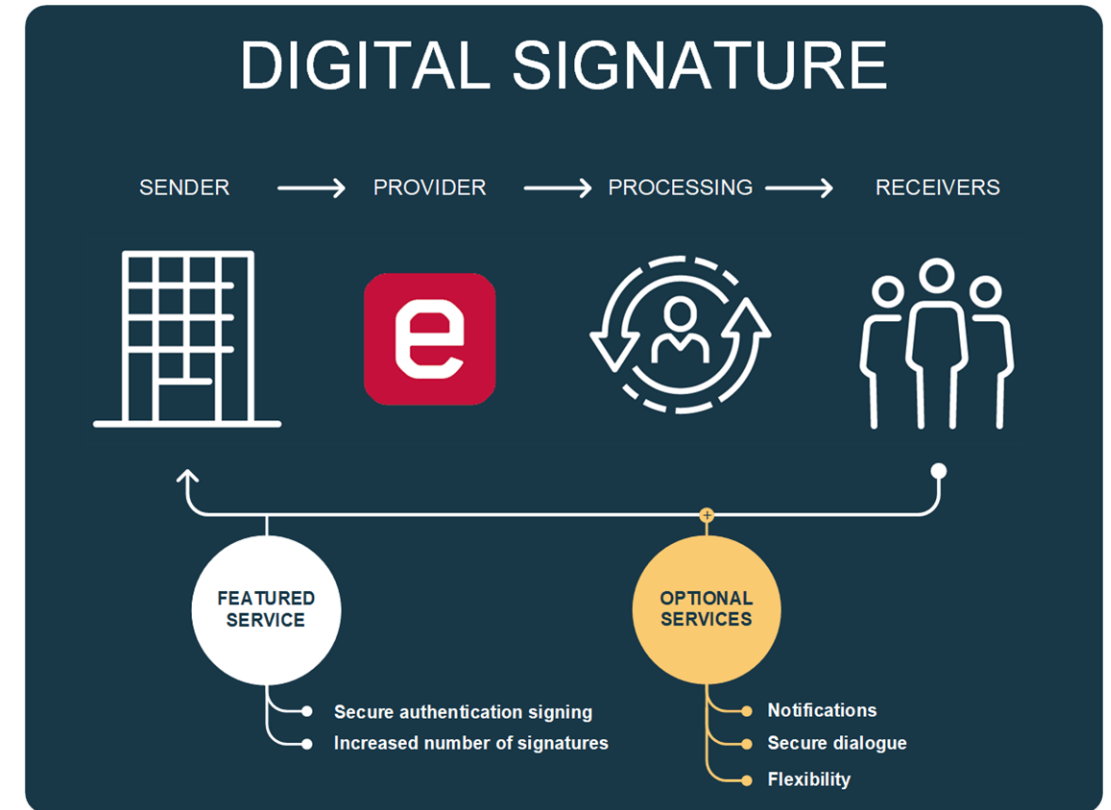

# Process

For senders who are already set up to send and receive documents via e-Boks, the **e-Boks Digital signature** solution is almost a plug-and-play solution as there is little need for additional configuration.

New senders must perform initial configuration of own systems to align with the e-Boks processes for signing documents.

1. Sender delivers contract or agreement to e-Boks when it is ready for signing
2. e-Boks notifies signer (end user) via e-mail that a document is ready for signing
3. The signer accesses e-Boks and opens the document that needs signing using proper eID authentication (such as MitID or BankID). Signer can reject to sign the document
4. The signed document is stored in e-Boks. Signer can always locate the document in e-Boks
5. Once the document has been signed, or rejected, sender receives a return receipt from e-Boks. e-Boks offers to either store the signed documents in a special archive, or to return the documents to sender via the existing interface.

# About us

e-Boks is a trusted Nordic provider of secure platforms and digital postboxes.

We offer companies and public authorities a user-friendly, effective, intuitive, compliant and secure platform for digital communication.

Since 2001, e-Boks has empowered companies and governmental organisations to send millions of documents through the platform each year and bring their organisations into the digital age.

e-Boks helps businesses' communications meet the strictest global security standards; giving their customers the trust that their data is safe.

Today, we are an important infrastructural component across the globe, where we have passed more than 24 million users.
