

DIGITAL SIGNATURES

Made by e-Boks. Digitize the signing process and save time and money

Digitize the signing process and save time and money

e-Boks Digital signatures solution provides an efficient and secure digital signing process for all parties.

Senders and end users benefit from a streamlined communication flow that saves time and effort while making business communication lighter and more efficient.

For the contracting parties, communication around signing is experienced as fast, reliable and secure.

Increased volume of completed agreements and strengthened competitive edge

The sender will experience an increase in the volume of completed agreements, growing revenue, and a strengthening of the competitive edge.

Flexibility for end users

End users can sign agreements, such as loans and employment contracts, 24/7 from their computer, tablet, or mobile phone.

The digital signing process allows end users to act when it suits them, while ensuring a smooth and intuitive experience.

Certificates and delegation

Companies can use private or employee certificates when signing documents on behalf of the company via the corporate e-Boks account.

Alternatively, companies can delegate corporate documents to be signed from a private e-Boks account.

Secure delivery, notifications and archiving

The solution ensures reliable and secure delivery of documents to be signed and that documents are processed according to the highest security standards.

It includes notification service, follow-up services, and archiving options.

Validation and authorisation regulations

Where applicable for the documents, the e-Boks Digital signatures solution supports validation according to rules and authorisation regulations.

Company benefits

- **e-Boks Digital signatures** offers substantial savings compared to the traditional, physical signing process
- Process optimization
- Fast response time and reliable delivery to the end user (signer)
- Improved service to end users
- Strengthening the competitive edge
- Higher number of completed agreements.

End user benefits

- Flexibility (ability to sign documents 24/7)
- Sign documents in a browser or app via computer, tablet, or mobile phone
- High end user satisfaction
- Safely store signed documents in e-Boks for life
- Proactive notifications on email and/or SMS.

Functions

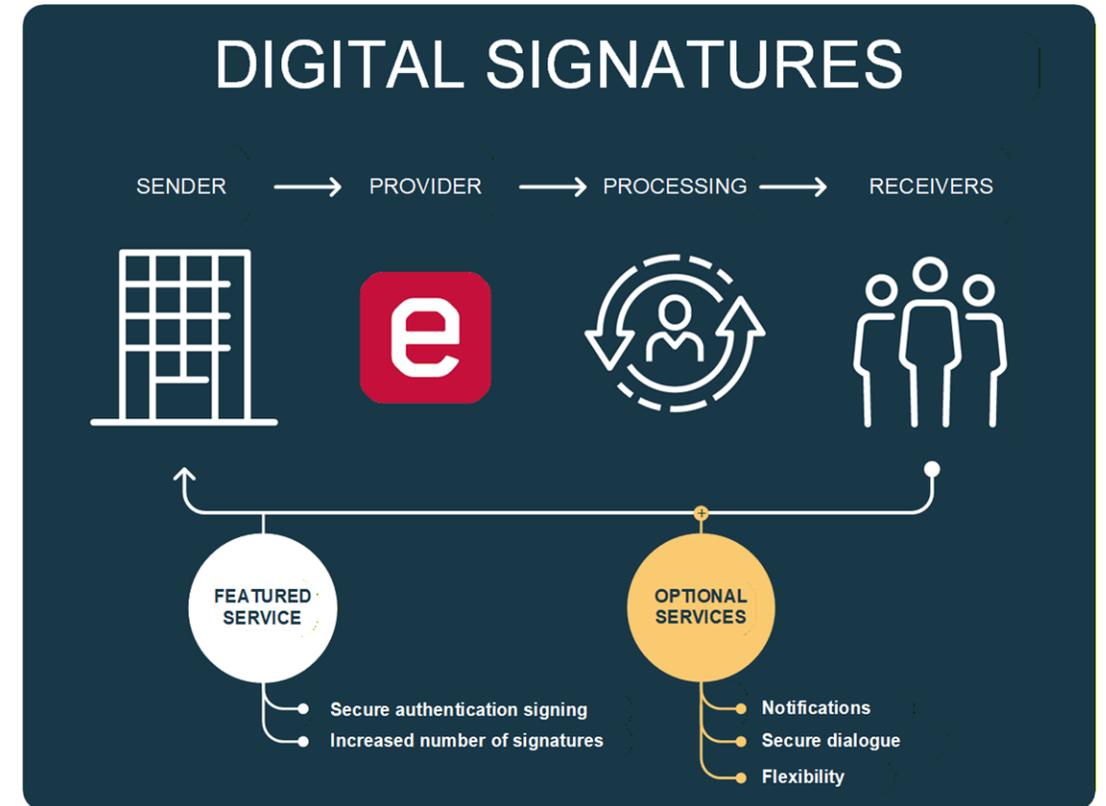

- Private signing of documents
- Corporate signing of documents
- Delegate the signing of corporate documents
- Get signing notifications
- Support document formats like PDF, XML, and TXT
- Archiving end user copies in e-Boks
- Archiving of sender copies in e-Boks (optional).

Signing process

For senders who are already set up to send and receive documents via e-Boks, the **e-Boks Digital signature** solution is almost a plug-and-play solution as there is little need for additional configuration.

New senders must perform initial configuration of own systems to align with the e-Boks processes for signing documents.

1. Sender delivers contract or agreement to e-Boks when it is ready for signing
2. e-Boks notifies signer (end user) via e-mail that a document is ready for signing
3. The signer accesses e-Boks and opens the document that needs signing and signs using MitID or other type of eID. The signer can refuse to sign the document
4. The signed document is stored in e-Boks. Signer can always locate the document in e-Boks
5. Once the document has been signed, or rejected, sender receives a return receipt from e-Boks. e-Boks offers to either store the signed documents in a special archive, or to return the documents to sender via the existing interface.

About us

e-Boks is a trusted Nordic provider of secure platforms and digital postboxes.

We offer companies a user-friendly, effective, intuitive, compliant and secure platform for digital communication.

Since 2001, e-Boks has supported companies and governmental organisations to send millions of documents through the platform each year and bring their organisations into the digital age.

e-Boks ensures that business communications meet the highest global security standards, giving customers complete confidence that their data is secure.

With more than 24 million users, we are now an important part of the global infrastructure.
